

# ***STAND ALONE DRIVE FOR WARE HANDLING EQUIPMENT***

Multi-motor control system for independent drive  
and synchronization of ware transfer, cross  
conveyor and stacker.

## Technical Features

- ⇒ Easy job-setting and re-start procedure.
- ⇒ Multilanguage interface and multilevel password access.
- ⇒ User friendly interface 10" touch screen.
- ⇒ 3 Brushless AC servo-motor.

## Control System and Synchronisation

PLC based digital control drive.

Synchronisation enabled by impulse signal coming from drive or line timing or independently generated through sensors assembled on feeder mechanism.

## Power Supply

400 V, 50 Hz, Three-phase.  
Installed power: 9 KW .

## Advantages

Flexibility and accuracy of the automatic handling of glass containers.

## Optional

Control cabinet in shop floor version equipped with built-in air conditioning system.
